

NERACOOS IN CONNECTICUT

- Improving Search & Rescue Efforts
- Facilitating Marine Navigation
- Supporting Coastal Resilience
- Protecting Public Health

"Not a day goes by where we don't use NERACOOS data. Without it we'd be sending our Coast Guard crews out uninformed and at greater risk."
 -Captain Brian Gilda, U.S. Coast Guard

"As a marine educator, I rely on a variety of data resources to instruct, inspire, and safely bring students on the water. Without real time data and predictions for weather, tides, wave height and temperature, I would not be able to do my job."
 -Captain Caleb Rose, New England Science & Sailing

"All of the merchant mariners I know on Long Island Sound use the Central Buoy wind and wave data every day. Weather forecasts are good, but there is no substitute for real-time measurements of wave height, wind speed, and direction."
 -Mike Whitten, Gwenmor Marine Contracting

"The real-time data collected by the NERACOOS buoys in Long Island Sound give us a great insight to the daily changes in water quality, changes that we cannot capture during our monthly monitoring surveys."
 -Matthew Lyman, CT Dept. of Energy & Env. Protection
